

Weekly report

J.Nassalski, 9.07.2004

June 2-9, week: 27/28, SPS period: P1C
Runs: 37043 -

spills available (from Jiawei on 9.07 at 10:45):

| Fr 2.07 | Sa 3.07 | Su 4.07 | Mo 5.07 | Tu 6.07 | We 7.07 | Th 8.07 | Fr 9.07 |
|---------|---------|---------|---------|---------|---------|---------|---------|
| 2341 | 4636 | 4894 | 1371 | 913 | 4081 | 2911 | 2167 |

Beam - expected - at the beg. of the week : 5d 16h (136h)
- after the septum failure: 5d 12h 45' (132.75h) \rightarrow 99%
- nonavailable to COMPAS (logb.) : 16h \rightarrow availability \rightarrow 88%

DETECTORS

Fr 2.07 | Sa 3.07 | Su 4.07 | Mo 5.07 | Tu 6.07 | We 7.07 | Th 8.07 | Fr 9.07

RICH: PD0-EFG, PD2-I, PD4-CE, PD6-C at reduced HV

Incl. MT unprescaled

RUNS

runs/shift: { =200 spill runs: ●
< 200 spill runs: ● - due to beam or COMPASS, could be **Good OK**

(Data until Friday 9.07 14:00)

=200 spill runs: **58**

<200 spill runs: **63**

SHORT RUNS

SHORT RUNS:

- *might be more than 1 problem*
- *due to (detector \leftrightarrow DAQ?):*

| | | | | | | | | | | |
|-------------|------------|-------------|-----------|-----------|------------|-------------|-------------|--------------|-------------|----------|
| BEAM | DAQ | TRIG | MM | Si | W45 | RICH | ECAL | CIND. | TGT. | ? |
| 12 | 19 | 11 | 9 | 1 | 1 | 1 | 5 | 2 | 1 | 7 |

THINGS TO IMPROVE

- **LOGBOOK:** - give clear reasons for stopping the run
(DAQ \leftrightarrow detector)
- write down clearly beam-off time
- **MM alarms**
- **HODOSCOPE HV alarms (done?)**
- **DAQ performance**
- **Update REFERENCE PLOTS**

THINGS TO IMPROVE ctd.

MODIFY ALIGNMENT PROCEDURE

*Marcin Stolarski suggestions
for present intensity:*

MAGNETS OFF

- unprec. by 2: VI, VO+H04, BT
- 50 spills (100 before)

MAGNETS ON

- unprec. by 2: VI
- unprec. by 16: VO
- unprec. by 2: BT
- unprec. by 2: Incl. MT
- 25 spills (50 before)

prescale for higher beam intensit.

*(At present nobody
is using this data
but some feel that it
might be used in
future improvements)*

Beam off according to the logbook:

2.07; 17:40, 30'
19:00, 20'
3.07; 12:30, 60'
5.07; 2:30, 40'
7:30, 2205' – MD & septum
7.07; 9:20, 40'
16:45, 30'
23:00, 480'
8.07; 9:30, 42'
11:15, 16'
13:30, 120'
16:32, 20'
9.07 10:17, 60'

956' ≈ 16h
